**Miller Medical Clinic
Vernon Art Miller, M.D.**

I certify that I have received information and understand the use of Adipex P, Suprenza, Qsymia, Phentermines and Belviq. I know there are potential side effects that I must notify my doctor of immediately.

Side effects I will report immediately are:

Phentermines include Adipex-P, Suprenza and part of Qsymia.	Qsymia	Belviq
Dry Mouth Shortness of breath Chest Pain Loss of consciousness Increased blood pressure Headache, dizziness, tremors Palpitations Irregular heart rhythm Psychosis New swelling in ankles or feet Rash Sleep problems Impotence	*Fetal Toxicity Insomnia Dizziness Dry mouth Ever had a kidney stone Topiramate-increase risk of suicidal thoughts Mood or sleep disorders Dysgeusia-change in taste Constipation Paraesthesia Elevated heart rate	Dry mouth, headaches, dizziness, Fatigue, nausea, constipation, painful <u>Erection lasting greater than 4 hours</u> Tell your Doctor if you are or begin to take: Triptans, used to treat migraine headache, medicines used to treat mood, anxiety, psychotic or thought disorders, including tricyclics, lithium, selective serotonin reuptake inhibitors, selective serotonin-norepinephrine reuptake inhibitors, monoamine oxidase inhibitors or antipsychotics, cabergoline, linezolid (an antibiotic), tramadol, dextromethorphan (an over the counter medicine used to treat the common cold or cough), over-the-counter supplements such as tryptophan or St John's Wort, medicines to treat erectile dysfunction.
<hr/> Develop Glaucoma Become Pregnant	<hr/> Diagnosed with glaucoma Have a kidney stone Become pregnant Metabolic acidosis Cognitive impairment	Before you take BELVIQ, tell your doctor if you have or have had any problems including: congestive heart failure, heart valve problems, slow heart beat or heart block, have diabetes, have a condition such as sickle cell anemia, multiple myeloma, or leukemia, have a deformed penis, Peyronie's disease, kidney or liver problems, are pregnant or plan to become pregnant, are breast feeding or planning to breast feed. You should not take Belviq and breast feed.

Our clinic may extend the length of time, beyond a few weeks that a patient will be taking Phentermine. Each patient's progress and physical condition is evaluated before this is done. However, as a patient, I understand that this may be done by my doctor and his staff of nurse practitioners.
